Application/Control Number: 09/981,148

Art Unit: 3634

The status of the claims is as follows:

Claims 3, 12-14, and 16-27 have been cancelled; and Claims 1, 2, 4-11, 15, and 28-29.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7-11, 15, and 28-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Allen(5,899,303). As shown in Figures 10A, 10B or 12A, and 12B, Allen discloses a first door panel (108a) which translates along a tilted track between open and closed positions, a first seal (126, each surface of the seal which extends from a "mounting surface" (108a, 108b) of the door is orthogonal thereto, this includes a top, bottom, and two side surfaces) attached between an attachment end and a distal end, and a second seal (124, the corner end of the seal forms an L-shape along two surfaces) attached between a second attachment end and a distal end and having the same cross-sectional shape (both rectangular), wherein upon closing of the door panel (108a) the seals provide a compression with respect to each other to seal a gap between a closure and an opening (Figure shown in previous office actions).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 09/981,148

Art Unit: 3634

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4-6 are further rejected under 35 U.S.C. 103(a) as being unpatentable over Allen ('303) in view of Clark (2,878,532). All of the elements of the instant invention are discussed in detail above except providing an actuation system for driving the door panel between an open and closed position. Clark ('532) discloses an actuation system, which drives a door panel laterally between an opened and closed position. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide a the door assembly of Allen ('303) with an actuation system as taught by Clark ('532) since an actuation system allows the doors to be automatically opened and closed.

The applicant's arguments have been considered but are not deemed persuasive. The surface in question is the surface on the left side of seal (126), which is in contact with the second seal (122). This surface is two dimensional and the plane of the first seal (126) extends both vertically (parallel to surface 108a of the first door panel 94) and horizontally (perpendicular/orthogonally to surface 108a of the first door panel (94).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Redman whose telephone number is 571-272-6835. The examiner can normally be reached on M-TH from 8 to 6.

Application/Control Number: 09/981,148 Page 4

Art Unit: 3634

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Cuomo, can be reached on 571-272-6856. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
